

SMART ADDITIONS TO PROTECT YOUR HOME INSIDE AND OUT.

Water, power, cable, data, gas ... today's homes are connected. Whether it's exterior underground piping or wiring, a service line failure on your premises can incur costs that are the homeowner's responsibility. With the amount of equipment found inside homes today (even outside), and the sensitive technology that drives it, breakdowns are inevitable. That's why UPC Insurance offers two smart enhancements to your policy – Service Line Coverage and Home Systems Protection.

With UPC, expect innovative protection from the unexpected.

Service Line Coverage

Did you know homeowners are responsible for the maintenance and repair of outdoor water, sewer, and other utilities running underground from the street to their homes? Most standard homeowners policies don't cover the related repair costs, which can also include excavation and outdoor property damage, but adding Service Line Coverage from UPC to your homeowners policy can help keep you covered.

Home Systems Protection

Every home depends on sophisticated equipment to keep life running comfortably. This includes everything from ovens to air conditioners, which can now be covered for mechanical and electrical breakdowns not covered in standard homeowners policies. If you're a homeowner, enhancing your policy with Home Systems Protection from UPC can help cover the costs of a breakdown.
